

MIP MVP — Board Guide

4 diagrams on this board. Read top to bottom.

Diagram 1 — Main Workflow (top of board)

How data moves through MIP from analyst action to AI output. 4 swim lanes: Analyst sets up → Data in → MIP processes → Analyst acts. **Start here if you're new to MIP.**

Diagram 2 — Module Breakdown

Every module split by priority.

- **Red = P0** — blocks the Wednesday demo if missing. All 6 must ship.
- **Blue = P1** — must ship by Wednesday. Workspace, RBAC, OAuth.
- **Grey = Stretch** — only if core is done early.

Diagram 3 — Data Schema Map

Every field group mapped visually.

- Brand Profile fields (16)
- Meta Ads input columns (16)
- Google Ads input columns (16)
- AI output — 5 required outputs
- Workspace & RBAC tables (5)

Diagram 4 — Scope Boundary (bottom of board)

What is IN vs OUT of MVP.

- **Green = in MVP, P0**
- **Blue = in MVP, P1**
- **Grey = NOT in MVP** (Phase 1, 2, or 3+)

If anyone asks for something grey — the answer is "roadmap."

Colour key (applies to all diagrams)

-  Green = done / healthy / in scope
-  Blue = P1 required / workspace layer
-  Yellow = input data / processing
-  Red = P0 critical / blocked / error state
-  Grey = out of scope / deferred
